Note: The HEDIS specifications for the Follow-up After Hospitalization for Mental Illness measure significantly changed for the CY 2017 measurement period. In previous years, follow-up visits with a mental health provider that occur on the date of discharge were included in the calculation; beginning with CY 2017 they are no longer included. Florida Medicaid plan rates are compared to national means that are for services received during the previous year. Since the CY 2016 and CY 2017 measure specifications are significantly different, results are not comparable and are therefore not being reported this year.
