

The Ad Hoc Group to the Agency for Health Care Administration (AHCA) Medical Advisory Committee convened on June 25th, 2008 to review Medicaid coverage of atypical anti-psychotics in the pediatric population.

This public meeting was noticed in the Florida Administrative weekly and all stakeholders were welcomed to attend. Public testimony was received at the meeting and in written testimony for up to one week following the meeting. A second meeting notice for December, 19th, 2008 was withdrawn as it was determined by AHCA that sufficient input was received by all the stakeholders and a final written report could be produced.

Prior to preparing the final report, (AHCA) would like to extend a second invitation to the public for written testimony concerning the coverage of atypical anti-psychotics in children. Written testimony should be submitted to the AHCA communications email address at: AHCACommunications@ahca.myflorida.com. The AHCA will continue to accept written testimony until end of the business day on December 24th, 2008.
