

A PROGRAM UPDATE for our onsite clinic partners in FLORIDA -

In the ongoing interest of promoting the health and well-being of their constituents, on Thursday, January 7th, the State of Florida requested that all LTC facilities taking part in the Federal Long-Term Care Pharmacy Partnership program and whose first clinic date is on or after January 23rd be moved to a state program receiving on-site clinics 1, 2 and 3 from CDR Health. We are cooperating with the state to make this transition, ensuring that each facility gets their vaccination program completed as quickly as possible.

What this means to you:

- **If you've already had your first onsite clinic with CVS Health, or your first onsite clinic with CVS Health is scheduled to occur on Friday, January 22nd or sooner**, your clinic cycle will continue, as scheduled and uninterrupted with CVS Health.
- **If your first clinic has been scheduled on Saturday, January 23rd or later, or your first clinic has not yet been scheduled, CDR Health should be contacting** all facilities that do not have first clinics already scheduled, or whose first clinic is scheduled January 23rd or later.

Questions of CDR Health may be submitted to Ltcvaccines@cdrmaguire.com.

Please see the attached announcement from the Florida Agency for Health Care Administration.
