## Guidance and Clarification on Division of Emergency Management (DEM) Emergency Order No. 20-006

---

An Emergency Order was recently issued to create broad limitations on visitation at long-term care and residential facilities to protect residents from COVID-19. To assist with clarifying this directive, the Agency for Health Care Administration has started a list of the most commonly asked questions.

1. **What are necessary health care services as allowed by the Emergency Order?**

Medically necessary health care includes health services as well as support services such as activities of daily living and assistance with resident self-administration of medication. This exception applies to individuals who previously performed them on a regular basis.

**For example, any** family member or sitter who provided assistance with activities of daily living, such as feeding a resident or assisting with bathing, prior to the Emergency Order issued on March 15, 2020, may continue to provide these services.

2. **Can staff who have been on a flight within the last 14 days enter a facility?**

Yes. Facility staff are exempt from the 14-day air travel prohibition if the individual does not meet any of the other screening criteria. The facility must still follow the required documentation criteria.

3. **Can hospice workers enter the facility?**

Yes. Hospice workers are allowed to see a resident with hospice orders so long as the hospice workers meet the other screening criteria in the Emergency Order.

The full Emergency Order is available here:
